

Earth was once small  
& one landmass planet

YAH's creation people  
once were ONE tribe

Indeed, the ancient young planet earth once was one big landmass small planet. Before sin spill on earth. Long before the land became a divided lands. The same for how YAH's creation people who were once one tribe, one culture, and one language who knew the Creator Father's Name אֱלֹהִים (which pronounce like Yah-OO-ah YAHUAH). Before they became the divided tribe of people with difference belief, cultures, and languages because they disobedience אֱלֹהִים way of life. They have has caught blood on their hand and spilled blood on earth which shakiness cursed the world to divided.

You might not believe this, but would you believe that our or your nation(s) would end up divided again? Just as how our long past ancestor came from one foreign land before it became a divided land? Because of how variety of people have difference beliefs and way of life. If yes, therefore you should also agree to what had happened to the ancient earthly world.

We cannot deny that earth was once looked like it was one landmass planet. Because of how every continent of the lands around the world puzzle looked like it was once connected. We also know that earth have had numbers of earthquake which had shaken the landscape apart. We also have seen how a volcano has erupted with lava and this lava can expand create a new landscape. This is how and why we see under the deep sea of ocean; the landscape below has this many mark pattern that connected all the way up to the earthly soil ground. That is a sign of how the earth expand grow like a balloon.

Another way to identify how and why this can be true. Notice the pyramid in Brazil and El Castillo in Yucatan, Mexico along with other Pyramid cross the sea far land where ancient people also had built a Pyramid like. Like a Pyramid of Khufu in Cairo, Egypt or Prang Temple (Koh Ker Temple) in Koh Ker, Cambodia as well. There are more pyramids discovered around the world. People far back in ancient day, were not yet able to travel in far cross sea. How did the people who build

Pyramid of Giza in Egypt

these pyramid(s) have the same ability and skills to build just like the other far land civilized people have built? Plus, these civilized people also seem to look alike as well. Like how and why the ancient Brazilian people looked like Asian people? The only logical answer to that, people once walked a far land before the land was divided apart.

Let look at TANAKH (the Old Testament) early timeline history, we know earth once had a huge major earthquake during the time of Noah. The great flood of Noah's day. ~~3333~~ had to destroy the great evildoer on earth, HE has only saved pickler number of animals and eight people in the ark of huge ship. All the rest of the earthly animals and people were swallowed up in flood of water (Genesis chapter 6, 7 and 8). Please don't fall on the so-called big-bang theory and the disappearing dinosaur after the big asteroid impacted earth 50 or 100 million years ago. These are men own scientific theory without the scripture books evidence.

You will find more earthquake events that happen on earth throughout the scripture books, here are five example 1<sup>st</sup> Kings 19:11-12, Isaiah 29:6, Ezekiel 38:19, Amos 1:1, and Zechariah 14:5 all has these example. Even the scripture books mentioned earth has swallowed up the rebellious people as well. The earth landscape had shift move and change ever since.

Once again, our earthly planet once was smaller size planet than it is now. Because we have seen all kinds of evidence here. It like the planet earth is continuing to build more landscape. However, it might not continue forever because one day earth will no longer deal with sin. The nature of sin will be destroyed by ~~3333~~'s plan. Satan and the rest of 1/3 of the evil angels will be gone as well. Earth will somehow be renewed, but will it go back to the oriental size or just stop building?
